

## NATURAL DESIGN COLLECTION

### DESCRIPTIVE PRODUCT CARD

#### **MANOCER:**

It's a dough realized by noblest fiber-reinforced ceramized cement mortar, the result of twenty years of DECOR research experience, consisting predominantly in the most natural material existing: the stone and other natural origin ingredients, expertly blended, eco-friendly and fully recyclable.

**Usage:** for interiors and exteriors, facades, walls, shops, private homes etc..

**Installation:** 3D panels in MANOCER must be applied to the wall by means of appropriate adhesive, cement based, high-performance, with no vertical slip (Class C2TE). After drying, continue grouting panels using special grout supplied by Decor. Then, sanding and painting with any type of paint, treating them in advance with specific fixative.

#### **GERICE:**

It's a compound material, innovative, specially realized by our Company, based on ceramic fiber-reinforced gypsum, with high tech features eco-friendly.

**Usage:** for interiors in clubs, shops, private homes, etc..

**Installation:** 3D panels in GERICE must be glued to the wall using the special **COLLSTUK**, produced by Decor, should also be grouted with the same **CollStuk** (having the double meaning of adhesive glue and finishing).

Then, should be painted with any water-based paint, treating them in advance with specific fixative.
